

STEREOSTONE™

Step Into the Stone Age

LIFETIME WARRANTY

WOULD YOU HAVE THOUGHT HI-FIDELITY COULD LOOK SO GOOD?

With StereoStone Soundstealth technology, it is virtually impossible to distinguish between the StereoStone product from the real thing. All StereoStone loudspeakers now use FerroFluid technology which increases the thermal power handling while creating an even greater barrier to moisture.

Three Power Handling Choices

JUNIOR

100 Watt / 6.5" Duo-cone 8 ohm
 Good performance for pools, spas, small gardens, yards, patios & balconies.
Sensitivity: 88db spl 1 watt/1 meter.
Frequency Response: 65 hz - 17khz+/-3db.

STANDARD

125 watt / 6.5" Two-way 8 ohm
 Better for small & medium sized areas including pools, spas, and tennis courts.
Sensitivity: 89 db spl 1 watt/1meter.
Frequency Response: 55hz-20khz+/-3db.

COMMERCIAL

250 Watt / 6.5" Two-Way 8 ohm Commercial model rated best in overall high fidelity performance. For use in theme parks and where large wide areas of sound coverage is needed.
Sensitivity: 91 db spl 1 watt/1 meter.
Frequency Response: 55 hz - 20 khz +/- 3db.

Weatherproof Terminal Junction-Cup

LOUDSPEAKER RELIABILITY

Our exclusive loudspeaker design uses bridged tweeters combined with FerroFluid technology for a greater barrier to moisture as well as Increased thermal power handling. Additionally, a Santoprene weather resistant surround suspension is adhered to the latest in poly mica cone materials. These materials permit greater power handling with lower distortion.

PROFESSIONAL APPLICATIONS

StereoStone offers loudspeakers for commercial applications. Rated at 250 watts power handling and higher sensitivity, StereoStone commercial loudspeakers are typically 2 dB more efficient than the standard model providing maximum performance and reliability.

LINE TRANSFORMERS (Optional)

All of the StereoStone rock and stone enclosures are available with 25/70/100v line transformers. Immediately available in 30 watt or 60 watt maximum wattage output, each has adjustable wattage tap settings as well as an 8 ohm direct speaker setting. Adjustment control is neatly installed within the weatherproof junction cup and plug standard on all rock and stone models.

TRIPLE OUTDOOR PROTECTION

StereoStone products are "triple" protected to guard against insect infestation, the moisture from rain, snow, ice and sprinklers, as well as the Sun's ultra violet rays.

VOLUME CONTROLS (Optional)

72 watt 12 step Volume Attenuators (optional). Available on any of the Rock/Stone speakers, these allow for individual loudspeaker volume control.

WEATHERPROOF TERMINAL JUNCTION CUP

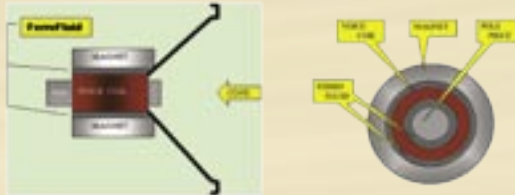

Standard on all Rock/Stone enclosed speakers, allows for the simple termination of the source cable within the weatherproof combination of a terminal cup and mated resin plug.

**New Magnetic Fluid Technology
Protection Exclusively in all
Stereostone Products**

All Stereostone outdoor weather proof loudspeakers have improved performance and reliability. By using Ferrofluid Technology in the motor assembly of all loudspeaker drivers, (both Woofers and Tweeters) eliminating the possibility of any moisture, rust or corrosion developing in the Voice Coil Gap.

Ferrofluid is a magnetic liquid material which is held in the gap of the motor by the loudspeaker magnet. This liquid displaces the air in the gap and is capable of dissipating five times more heat developed by the Voice Coil than without of the Ferrofluid.

The use of this technology not only increases the thermal power handling of the loudspeaker, but also improves damping, accurate Voice Coil centering and most important for music lovers reduced distortion.

STANDARD

8" Woofer with bridged 3/4" Poly-Dome Tweeter
125 Watt Power Handling, 8 Ohm
Two-way, sensitivity 91 db spl 1 watt/1 meter.
Frequency Response 50hz-20k hz +/- 3db.

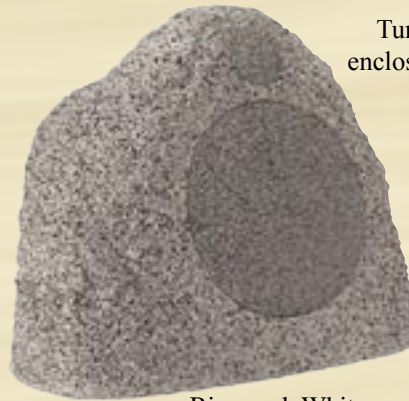

COMMERCIAL

8" Woofer with bridged 1" Neodymium magnet
- Titanium Dome Tweeter
250 Watt Power Handling, 8 Ohm
Two-Way, sensitivity 93 db spl 1 watt/ 1 meter.
Frequency response 48 hz - 20 k hz +/- 3db.
